

chromecast

To use a Chromecast at MAC (Most TVs/Projectors!) you'll need to make sure you are a **Staff Member** connected to **MAC WiFi**, then follow these three steps:

When Finished: Find your classroom in the destinations list and click “Stop Casting”

DO NOT: Click “Stop” on any other classrooms, as you will interrupt their connection. You can only be connected to one at a time so it's not you!

Apple Computers: Casting “Desktop” from Apple computers won't transmit audio without another program, available from IT. Most of the time the process is as above.

Can't See Your Classroom?: 99% of the time this is due to Chrome on your computer being out of date. Try restarting!
